# Soumi Samanta

*Mobile Application Developer*

samantasoumi10@gmail.com | +91 9883057054 | soumi.samanta.clipboux.online

- **Flutter Developer** with almost **2 years** of experience in building responsive, scalable, and user-friendly **mobile applications** using **Flutter**, **Dart**, **REST APIs**, **Firebase**, and **state management** solutions (**BLoC**, **GetX**, **Provider**, **Riverpod**).
- Currently working as a **Flutter Developer** at **IntersoftKK Pvt. Ltd.**, developing an Enterprise Workforce Management Application using Clean Architecture, BLoC, and real-time integrations.
- Previously worked as an **Associate Developer** at **Aiinhome Technologies Pvt. Ltd.**, contributing to the **Aviio** (**AAHL Mobile App**) through frontend development and REST API integration.
- Developed **Vagabond**, a personal social travel-sharing application using Flutter, Clean Architecture, BLoC, Node.js, Express, and MongoDB, featuring real-time chat, stories, media sharing, and push notifications.

## Experience

### Aivista & Aiinhome Technologies Pvt. Ltd. (Associate Developer)

*Dec, 2024 - Jan, 2026*

- Worked on a live airline-based project as a **Flutter frontend developer.**
- Designed and implemented user-friendly and responsive mobile UI aligned with industry-standard UX principles.
- Integrated RESTful APIs to enable seamless data flow between frontend and backend.
- Collaborated in an Agile environment with cross-functional teams to deliver features in production.
- Google Playstore Link: - https://play.google.com/store/apps/details?id=com.adani.aahluc

### IntersoftKK Pvt. Ltd. (Flutter Developer)

*2026 - Present*

- Developing a production-ready Enterprise Workforce Management App using Flutter, Clean Architecture, BLoC state management, and GetIt for dependency injection.
- Implementing key modules including Attendance & Location Tracking, Timesheets, Leave Management, Expense Reimbursements, and Performance Tracking, with document scanning and digital signatures.
- Integrating REST APIs, Socket.IO, Firebase Cloud Messaging, SQLite offline caching, secure storage, and Firebase Crashlytics, with separate development and production configurations.
- **Google Playstore Link:** - https://play.google.com/store/apps/details?id=com.intersoftkk.workspace

## Projects

### Vagabond (Mobile Application)

- Developed **Vagabond**, a social travel-sharing platform featuring posts, photos, videos, 24-hour stories, highlights, likes, comments, and public/private profiles.
- Implemented real-time one-to-one messaging with emoji reactions, typing indicators, online presence, and push notifications using Socket.IO and Firebase.
- Built using **Flutter (Clean Architecture, BLoC)**, Node.js, Express, and MongoDB, integrating Cloudinary, JWT authentication with token rotation, and email OTP verification.
- **Google PLaystore Link:** - https://play.google.com/store/apps/details?id=app.vagabond.com

## Education

### M.Sc Computer Science (The University of Burdwan, West Bengal)

*2022 - 2024*

- SGPA: 8.50

### B.Sc Computer Science (Burdwan MUC Women's College, West Bengal)

*2019 - 2022*

- SGPA: 9.28

## Skills

- **Languages:** Dart, Kotlin, Javascript
- **Frameworks & UI Toolkits:** Flutter, Jetpack Compose, Express
- **Databases:** SQLite, MySQL, MongoDB
- **OS:** Windows, Linux, Mac
- **State Management:** BLoC, GetX, Provider, Riverpod,
- **APIs:** RESTful APIs
- **Cloud:** Firebase
- **Architecture:** Clean Architecture, Modular Architecture
- **Version Control:** Git, GitHub
